PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION
Keep out of reach of children and pets. Wear gloves when applying bait. With detergent and hot water, wash all implements used for applying bait. Do not use these implements for mixing, holding or transferring food or feeds. Treated baits should be placed in locations not accessible to nontarget wildlife and domestic animals, or in tamper-resistant bait boxes.
If swallowed by human beings, domestic animals or pets, this material may reduce the clotting ability of the blood and cause bleeding. In such cases, intravenous and oral administration of Vitamin K1 combined with blood transfusions is indicated as in the case of hemorrhage caused by overdoses ofbishydroxycoumarin (Dicumarol).

ENVIRONMENTAL HAZARDS
This product is toxic to wildlife and fish. Use with care when applying in areas frequented by wildlife or adjacent to any body of water. Treated bait exposed on soil surface is hazardous to birds and other wildlife. Keep out of lakes, ponds, and streams.

DIRECTIONS FOR USE
GENERAL CLASSIFICATION
FOR DISTRIBUTION AND USE ONLY IN CALIFORNIA.
It is a violation of State and Federal laws to use this product in a manner inconsistent with its labeling. (See Baiting Procedures.)

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.
STORAGE: Store only in original container in a dry area inaccessible to children and pets.
Pesticide disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER DISPOSAL: Completely empty carton into application equipment. Then dispose of empty carton in a sanitary landfill or by incineration or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

IMPORTANT
A single feeding of this anticoagulant bait will not control rodents. Bait must be eaten at several feedings on five or more successive days with no periods longer than 48 hours between feedings.
Keep this product in a closed container, free from odors which may contaminate the bait and reduce acceptability.

P.C.Q.

PELLETED RODENT BAIT

ACTIVE INGREDIENT: Diphacinone;
(2-Diphenlacetyl-1,3-indandione) ........................................ 0.01%
INERT INGREDIENTS:................................................................ 99.99%
TOTAL 100.0%

KEEP OUT OF REACH OF CHILDREN

CAUTION
FIRST AID TREATMENT
IF SWALLOWED: Call a physician or Poison Control Center;
drink 1 or 2 glasses of water and induce vomiting by touching
back of throat with finger. Do not induce vomiting or give
anything by mouth to an unconscious person.

For 24-hour emergency medical advice, call
1-877-854-2494

NET CONTENTS: 50 lbs.

Manufactured by:

Bell Laboratories, Inc.
Madison, WI 53704

EPA EST. NO. 12455-WI-1 EPA SLN NO. CA 780146 CALIF. REG. NO. 12455-50003AA

IMPORTANT
A single feeding of this anticoagulant bait will not control rodents. Bait must be eaten at several feedings on five or more successive days with no periods longer than 48 hours between feedings.

NOTE: Do not use in a manner that will contaminate feed or foodstuff.

GROUND SQUIRRELS, Spermophilus beecheyi, S. beldingi—Scatter by hand approximately 2 oz. of bait (one handful) evenly over 40 to 50 square feet near active burrows or runways. Retreat every other day for 3 to 4 applications. An uninterrupted supply of bait should be available for 6 to 8 days. Don't pile bait. The scattering of bait takes advantage of the squirrels' natural foraging habits and limits domestic livestock and wildlife from picking it up.

DEER MICE, Peromyscus spp.—Deer Mouse Control in Forests: Spread bait evenly by hand, mechanical spreader or aircraft at the rate of two pounds per acre through the area where seeding will later take place. Sufficient bait should be applied to last the mouse population a minimum of four days (preferably without rain). Bait application should precede the sowing of conifer seed by 10 days to 2 weeks.

HOUSE MICE, Mus musculus—Place tablespoon amounts (1/4 to 1/2 ounce) of bait in bait box or shallow container, preferably in protected feeder station. Place bait station at 8- to 12- foot intervals in dry locations such as in concealed places, in corners, or along walls where house mice feed, of water. Treated bait exposed on soil surface is hazardous to birds and other wildlife. Keep out of lakes, ponds, and streams.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

532902
1. PRODUCT AND COMPANY IDENTIFICATION

Product Identifier: P.C.Q.® PELLETED RODENT BAIT
EPA SLN Registration Number: CA 780146
California Registration Number: 12455-50003-AA

Relevant identified uses of the substance or mixture and uses advised against
Relevant identified uses: Anticoagulant Rodenticide - Ready to use. For use only in the state of California
Uses advised against: Use only for the purpose described above

MANUFACTURER/SUPPLIER:
Bell Laboratories, Inc.
3699 Kinsman Blvd.
Madison, WI 53704, USA
Email: sds@belllabs.com
Phone: 608-241-0202
Medical or Vet Emergency: 877-854-2494 or 952-852-4636
Spill or Transportation Emergency: 800-424-9300 (CHEMTREC)

2. HAZARD IDENTIFICATION

Classification according to Regulation OSHA 1910.1200(d): Not classified
See Section 15 for information on FIFRA applicable safety, health, and environmental classifications.

4. FIRST AID MEASURES

Description of first aid measures
Ingestion: Call physician or emergency number immediately. Have person sip a glass of water if able to swallow. Do not induce vomiting unless instructed by physician.
Inhalation: Not applicable.
Eye contact: Hold eye open and rinse slowly with water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. If irritation develops, obtain medical assistance.
Skin contact: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. If irritation develops, obtain medical assistance.

Most important symptoms and effects, both acute and delayed
Ingestion of excessive quantities may cause nausea, vomiting, loss of appetite, extreme thirst, lethargy, diarrhea, bleeding.
Advice to physician: If ingested, administer Vitamin K1 intramuscularly or orally as indicated for bishydroxycoumarin overdoses. Repeat as necessary as based upon monitoring of prothrombin times.
Advice to Veterinarian: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K1. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.
5. FIRE-FIGHTING MEASURES

Extinguishing media
Suitable Extinguishing Media: water, foam or inert gas.
Unsuitable Extinguishing Media: None known.
Special hazards arising from the mixture: High temperature decomposition or burning in air can result in the formation of toxic gases, which may include carbon monoxide.
Advice for firefighters: Wear protective clothing and self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: Gloves should be worn when handling the bait. Collect spillage without creating dust.
Environmental precautions: Do not allow bait to enter drains or water courses. Where there is contamination of streams, rivers or lakes contact the appropriate environment agency.
Methods and materials for containment and cleaning up
For Containment: Sweep up spilled material immediately. Place in properly labeled container for disposal or re-use.
For Cleaning Up: Wash contaminated surfaces with detergent. Dispose of all wastes in accordance with all local, regional and national regulations.
Reference to other sections: Refer to Sections 7, 8 & 13 for further details of personal precautions, personal protective equipment and disposal considerations.

7. HANDLING AND STORAGE

Precautions for safe handling: Do not handle the product near food, animal foodstuffs or drinking water. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco, or using the toilet.
Conditions for safe storage, including any incompatibilities: Store only in original container in a cool, dry place, inaccessible to pets and wildlife. Do not contaminate water, food or feed by storage or disposal. Keep containers closed and away from other chemicals.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

</table>

Established Limits

Appropriate Engineering Controls: Not required
Occupational exposure limits: Not established
Personal Protective Equipment:
Respiratory protection: Not required
Eye protection: Not required
Skin protection: Shoes plus socks, and waterproof gloves.
Hygiene recommendations: Wash thoroughly with soap and water after handling.
9. PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

Appearance/Color: Pale green granular pellet
Odor: Sweet grain-like
Odor Threshold: Not applicable, odor not associated with a hazardous material.
pH: Not applicable, PCQ Pelleted Rodent Bait is not dispersible with water.
Melting point: Not applicable to rodenticide bait
Boiling point: Not applicable to rodenticide bait
Flash point: Not applicable, PCQ Pelleted Rodent Bait does not contain components classified as flammable.
Evaporation rate: Not applicable, PCQ Pelleted Rodent Bait is a solid.
Upper/lower flammability or explosive limits: Not applicable, PCQ Pelleted Rodent Bait does not contain components classified as flammable or explosive.
Vapor Pressure: Not applicable to rodenticide bait
Vapor Density: NA: PCQ Pelleted Rodent Bait is a solid
Partition coefficient: n-octanol/water: Not applicable to rodenticide bait
Auto-ignition temperature: Not applicable, PCQ Pelleted Rodent Bait does not contain components classified as flammable.
Decomposition temperature: Not applicable to rodenticide bait
Viscosity: Not applicable, PCQ Pelleted Rodent Bait is not a liquid.

10. STABILITY AND REACTIVITY

Reactivity: Stable when stored in original container in a cool, dry location.
Chemical stability: Stable when stored in original container in a cool, dry location.
Possibility of hazardous reactions: Refer to Hazardous decomposition products
Conditions to avoid: Avoid extreme temperatures (below 0°C or above 40°C).
Incompatible materials: Avoid strongly alkaline materials.
Hazardous decomposition products: High temperature decomposition or burning in air can result in the formation of toxic gases, which may include carbon monoxide.

11. TOXICOLOGICAL INFORMATION

Information on toxicological effects
Acute Toxicity
LD50, oral (ingestion): >5000 mg/kg (rats) (Diphacinone Rat LD50 oral: 2.3 mg/kg bw).
LD50, dermal (skin contact): > 5001 mg/kg (rats) (Diphacinone rabbit LD50 dermal: 3.6 mg/kg bw).
LC50, inhalation: PCQ Pelleted Rodent Bait is a granular pellet and therefore exposure by inhalation is not relevant.
Skin corrosion/irritation: Not irritating to skin.
Serious eye damage/Irritation: Not irritating to eyes.
Respiratory or skin sensitization: Dermal sensitization: Not a Sensitizer (Guinea pig maximization test).
Germ cell mutagenicity: PCQ Pelleted Rodent Bait contains no components known to have a mutagenetic effect.
Carcinogenicity: PCQ Pelleted Rodent Bait contains no components known to have a carcinogenic effect.

Reproductive Toxicity: PCQ Pelleted Rodent Bait: No data
Aspiration Hazard: Not applicable. PCQ Pelleted Rodent Bait is a granular pellet.
Target Organ Effects: Reduced blood clotting ability.

12. ECOLOGICAL INFORMATION

Ecotoxicity Effects: This product is extremely toxic to fish, birds and other wildlife. Dogs and predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

Persistence and degradability: PCQ Pelleted Rodent Bait is inherently biodegradable.
Bioaccumulative potential: Not determined for PCQ Pelleted Rodent Bait. Diphacinone water solubility is extremely low (< 0.1mg/l).
Mobility in Soil: Not determined for PCQ Pelleted Rodent Bait. Mobility of Diphacinone in soil is considered to be limited.
Other adverse effects: None.
13. DISPOSAL CONSIDERATIONS

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

Pesticide Disposal: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

Container Handling: Non-refillable container. Do not reuse or refill this container. [Plastic:] Offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill; or by incineration. In most states, burning is not allowed. [Paper:] Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration. In most states, burning is not allowed.

14. TRANSPORT INFORMATION

UN number: Not regulated
UN proper shipping name: Not regulated
Transport hazard class(es): Not regulated
Packing group : Not regulated

Environmental Hazards
DOT Road/Rail: Not considered hazardous for transportation via road/rail.
DOT Maritime: Not considered hazardous for transportation by vessel.
DOT Air: Not considered hazardous for transportation by air.
Freight Classification: LTL Class 60
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC code: Not applicable
Special precautions for user: None

15. REGULATORY INFORMATION

Safety, health and environmental regulations/legislation specific for the substance or mixture:
FIFRA: This pesticide product is regulated by the United States Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets (SDS), and for workplace labels of non-pesticide chemicals. The safety, health, environmental, and hazard information required on the pesticide label is listed below and reflected throughout this SDS. The pesticide label also includes other important information, including directions for use.

Signal Word: CAUTION

Precautionary Statements: Contains the anticoagulant Diphacinone which may cause bleeding if ingested. Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. Do not get in eyes, on skin or on clothing.

Potential Health Effects:
Eye Contact: May cause irritation
Skin Contact: Non-irritating to the skin
Ingestion: Harmful if swallowed

TSCA: All components are listed on the TSCA Inventory or are not subject to TSCA requirements
CERCLA/SARA 313: Not listed
CERCLA/SARA 302: Not listed

16. OTHER INFORMATION

For additional information, please contact the manufacturer noted in Section 1.
